

## Noah Hoffman CS 202 Project 10 documentation sheet

### Purpose:

The purpose of this project was to be familiar with templates along with stack based dynamic data structures.

### Design:

The design of this project was similar to other projects. Driver file was not given to us and we had to make it ourselves along with making the NodeStack and ArrayStack implementation. I had to work in groups to help my code work correctly.

### Problems:

I had a lot of problems throughout this project and I am still learning about data structures. I find these hard to understand.

### Changes:

I spent a good amount of time on this project and I hope I got the correct output because it was not given to us. I had a hard time with this project but it worked out to what I thought.
