Noah Hoffman CS 202 Project 11 documentation sheet

Purpose:

The purpose of this project was to get familiar with recursion, and the ability to work with some STL functionalities along with templates, dynamic data structures, as well as manipulating dynamic memory, classes, pointers and iostream to all extents.

Design:

The design of this project was similar to other projects.

Problems:

I did not have many issues with this project and it was not too hard to understand. Now just time to study for the test !!

Changes:

My code spits out what I intended on so I would not change anything Thanks for the good semester !!!!
